Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 32-38, drawn to remote activation and programming of a mobile phone unit by a mobile phone system, classified in class 455 subclass 419-420.
 - II. Claims 11-31 and 39-44, drawn to a complex billing algorithm and rate data for internally calculating call charges, classified in class 455, subclass 405-409.

Inventions group I and group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, group I, is the process of down loading activation program and parameters by the mobile phone system to mobile unit. Whereas, group II, a software that deals with internal accounting in the mobile system and mobile unit that establish a debit account as prepaid funds, storing plurality of charge rates useful for calculating billing charges. Therefore, group I and group II are two distinct and different inventions that restriction applies.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2683

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
